PROFESSIONAL SUMMARY

Microsoft-certified Business Central developer with 4+ years of hands-on experience delivering AL extensions and ISV products for Microsoft partners and enterprise clients, with working knowledge of the Power Platform. Specialist in full-cycle ERP delivery — from requirement gathering and effort estimation through AppSource submission and post-go-live support. Known for clean, event-driven AL architecture that minimises upgrade risk, and for bridging complex business requirements with scalable technical solutions.

SKILLS

BC & NAV	AL extensions · C/AL · event-driven architecture · AppSource publishing · NAV-to-BC upgrades · BC SaaS · object migrations · RDLC/Word reports · license management · API integrations
Power Platform	Power Apps · Power Automate · Power BI · Copilot Studio · Dataverse · Power Pages · PCF controls · AI Builder · Custom Connectors · ALM · OnPrem Data Gateway · Power FX
DevOps & Tools	Azure DevOps · CI/CD · GitHub · Azure Portal · Partner Portal · SharePoint · SQL · PowerShell · VS Code · Power Platform Admin Center
Languages	AL · C/AL · C# · JavaScript · HTML · CSS

EXPERIENCE

Senior Technical Consultant Cetas Information Technology Pvt Ltd

Aug 2024 – Present
Chennai, India

- Spearheaded end-to-end delivery of 15+ AL extension projects — from requirement gathering through go-live — consistently within committed timelines and budget
- Led seamless ERP upgrade for Petrotec (Qatar), migrating from NAV 2013 to BC SaaS, rebuilding the full rental management module with zero data loss and zero critical post-go-live issues
- Drove product development for the NAVBUILD suite (NB Projects, NB Procure, NB QC, NB Assets, NB Payroll), deployed across multiple partner networks and end-user organisations
- Built NB Site App — a dual-role Power Apps mobile application integrated directly with Business Central API for real-time operational data, eliminating a local database dependency
- Managed AppSource submission processes and NAV/BC license generation for partner ecosystem
- Mentored 12 junior developers on AL best practices, CI/CD pipelines, and AppSource publishing standards, reducing team onboarding time significantly
- Designed and deployed Power Platform solutions: Performance Management System (Power Apps + SharePoint), Business Memo Automation (Power Automate, multi-stage RFQ approvals), and Legal Matter Management System

ERP Technical Consultant Cetas Information Technology Pvt Ltd

Sep 2022 – Aug 2024
Chennai, India

- Delivered tailored BC customisations and RDLC/Word report solutions for enterprise clients across multiple industries, achieving on-time delivery on all engagements
- Designed 10+ API integrations connecting Business Central with Power Platform and legacy systems, improving data flow efficiency by 35%
- Executed object migrations and technical customisations across client BC environments with zero data integrity issues
- Optimised SQL queries and AL code, cutting report generation time by up to 50% on high-volume datasets

- Completed intensive onboarding in AL/C/AL development across BC core modules — Purchase, Sales, Finance, and Warehouse — progressing to full consultant role within 2 months

CERTIFICATIONS

PL-900	Fundamentals	Microsoft Certified: Power Platform Fundamentals
MB-820	Associate	Microsoft Certified: Dynamics 365 Business Central Developer Associate
GH-300	Advanced	GitHub Copilot
AB-100	Architect	Microsoft Certified: Agentic AI Business Solutions Architect

NOTABLE PROJECTS

NAVBUILD Product Suite | Business Central AL, Power Platform

Led development and ongoing support of NAVBUILD's full product suite — NB Projects, NB Procure, NB QC, NB Assets, and NB Payroll — adopted across multiple partner networks. Built the NB Site App as a real-time BC API-integrated mobile tool, eliminating local database dependency for site and store operations.

Petrotec ERP Upgrade | Business Central SaaS, AL

Designed and executed full ERP migration for Petrotec (Qatar) from NAV 2013 to BC SaaS, including a rebuilt rental management module. Zero data loss. Zero critical post-go-live issues.

Performance Management System | Power Apps, SharePoint

Built an employee appraisal and performance evaluation platform on Power Apps with SharePoint as data source. Enabled goal tracking, feedback cycles, and HR review workflows for managers and HR teams.

Business Memo Automation | Power Automate, SharePoint

Automated the full RFQ creation and approval workflow using Power Automate with multi-stage routing, cutting manual processing time and improving procurement document efficiency.

Legal Matter Management System | Power Apps, SharePoint

Delivered a comprehensive legal matter management platform for a law firm — client tracking, engagement letter generation, and end-to-end matter resolution workflows integrated with the firm's existing portal.

KEY ACHIEVEMENTS

15+ AL Extensions Delivered Reduced custom code conflicts by 40% through event-driven architecture across production environments	8+ NAV/BC Upgrade Projects Led migrations from NAV/BC14 to BC21 with zero data loss and minimal downtime for all clients	50% Faster Report Generation Optimised SQL queries and AL code to dramatically cut processing time on high-volume reports
12 Developers Mentored Trained junior developers on AL best practices, CI/CD pipelines, and AppSource publishing	10+ API Integrations Built Connected BC with Power Platform and legacy systems, improving data flow efficiency by 35%	95% Client Satisfaction Delivered solutions an average of 20% ahead of schedule with zero critical post-go-live issues
