PROFESSIONAL SUMMARY

Microsoft-certified Senior Business Central Technical Consultant with 4+ years of hands-on experience delivering AL/C-AL extensions and ISV products for Microsoft partners and enterprise clients, with working knowledge of the Power Platform. Specialist in full-cycle ERP implementation — from requirement gathering and effort estimation through AppSource submission, NAV-to-BC SaaS upgrades, and post-go-live support. Known for clean, event-driven AL architecture that minimises upgrade risk, and for bridging complex business requirements with scalable technical solutions.

AREAS OF EXPERTISE

- **Business Central & NAV development** — 4+ years of technical consulting experience across Microsoft Dynamics NAV and Business Central, including BC14 through the latest BC SaaS releases.
- **NAV-to-BC upgrade specialist** — led an end-to-end migration from NAV 2013 to BC SaaS (Petrotec, Qatar) with a full module rebuild, zero data loss, and zero critical post-go-live issues.
- **ERP application development** — strong experience across development, enhancement, and maintenance of enterprise ERP applications, including upgrades, customisations, and AppSource-published extensions.
- **Supply Chain Management** — solid working knowledge of Sales & Receivables, Purchase & Payables, and Warehouse modules, applied across rental management, procurement, and asset-tracking solutions.
- **Event-driven AL architecture** — builds extensions using event-driven design patterns that reduce custom code conflicts and lower upgrade risk in production environments.
- **API & platform integration** — designed 10+ API integrations connecting Business Central with Power Platform and legacy systems, improving data flow efficiency by 35%.
- **Adaptable and fast-learning** — comfortable moving across changing client environments and requirements; mentored 12 junior developers on AL best practices, CI/CD, and AppSource publishing standards.

SKILLS

BC & NAV	AL extensions · C/AL · event-driven architecture · AppSource publishing · NAV-to-BC upgrades · BC SaaS · object migrations · RDLC/Word reports · license management · API integrations

DevOps & Tools	Azure DevOps · CI/CD · GitHub · Azure Portal · Partner Portal · SharePoint · SQL · PowerShell · VS Code · Power Platform Admin Center
Languages	AL · C/AL · C# · JavaScript · HTML · CSS

EXPERIENCE

Senior Technical Consultant

Cetas Information Technology Pvt Ltd

Aug 2024 – Present

Chennai, India

- Own end-to-end delivery of 15+ AL extension projects — requirement gathering through go-live — consistently within committed timelines and budget.
- Led NAV 2013-to-BC SaaS upgrade for Petrotec (Qatar), rebuilding the full rental management module with zero data loss and zero critical post-go-live issues.
- Drive product development for the NAVBUILD suite (NB Projects, NB Procure, NB QC, NB Assets, NB Payroll), deployed across multiple partner networks and end-user organisations.
- Built NB Site App, a dual-role Power Apps mobile application integrated directly with the Business Central API for real-time operational data, eliminating a local database dependency.
- Manage AppSource submission processes and NAV/BC license generation for the partner ecosystem.
- Mentor 12 junior developers on AL best practices, CI/CD pipelines, and AppSource publishing standards, reducing team onboarding time significantly.
- Design and deploy Power Platform solutions: a Performance Management System (Power Apps + SharePoint), Business Memo Automation (Power Automate, multi-stage RFQ approvals), and a Legal Matter Management System.

ERP Technical Consultant

Cetas Information Technology Pvt Ltd

Sep 2022 – Aug 2024

Chennai, India

- Delivered tailored BC customisations and RDLC/Word report solutions for enterprise clients across multiple industries, achieving on-time delivery on all engagements.
- Designed 10+ API integrations connecting Business Central with Power Platform and legacy systems, improving data flow efficiency by 35%.
- Executed object migrations and technical customisations across client BC environments with zero data integrity issues.
- Optimised SQL queries and AL code, cutting report generation time by up to 50% on high-volume datasets.

Technical Consultant Trainee

Cetas Information Technology Pvt Ltd

Jul 2022 – Sep 2022

Chennai, India

- Completed intensive onboarding in AL/C-AL development across BC core modules — Purchase, Sales, Finance, and Warehouse — progressing to full consultant role within 2 months.

CERTIFICATIONS

- **AB-100 (Architect)** — Microsoft Certified: Agentic AI Business Solutions Architect
- **MB-820 (Associate)** — Microsoft Certified: Dynamics 365 Business Central Developer Associate
- **PL-900 (Fundamentals)** — Microsoft Certified: Power Platform Fundamentals

- **GH-300 (Advanced)** — GitHub Copilot

NOTABLE PROJECTS

NAVBUILD Product Suite | Business Central AL, Power Platform

Led development and ongoing support of NAVBUILD's full product suite — NB Projects, NB Procure, NB QC, NB Assets, and NB Payroll — adopted across multiple partner networks. Built the NB Site App as a real-time BC API-integrated mobile tool, eliminating the local database dependency for site and store operations.

Petrotec ERP Upgrade | Business Central SaaS, AL

Designed and executed the full ERP migration for Petrotec (Qatar) from NAV 2013 to BC SaaS, including a rebuilt rental management module. Zero data loss. Zero critical post-go-live issues.

Performance Management System | Power Apps, SharePoint

Built an employee appraisal and performance evaluation platform on Power Apps with SharePoint as the data source, enabling goal tracking, feedback cycles, and HR review workflows for managers and HR teams.

Business Memo Automation | Power Automate, SharePoint

Automated the full RFQ creation and approval workflow using Power Automate with multi-stage routing, cutting manual processing time and improving procurement document efficiency.

Legal Matter Management System | Power Apps, SharePoint

Delivered a comprehensive legal matter management platform for a law firm — client tracking, engagement letter generation, and end-to-end matter resolution workflows integrated with the firm's existing portal.

KEY ACHIEVEMENTS

- **15+ AL extensions delivered** — reduced custom code conflicts by 40% through event-driven architecture across production environments.
- **8+ NAV/BC upgrade projects** — led migrations from NAV/BC14 to BC21+ with zero data loss and minimal downtime for all clients.
- **50% faster report generation** — optimised SQL queries and AL code to dramatically cut processing time on high-volume reports.
- **12 developers mentored** — trained junior developers on AL best practices, CI/CD pipelines, and AppSource publishing.
- **10+ API integrations built** — connected BC with Power Platform and legacy systems, improving data flow efficiency by 35%.
- **95% client satisfaction** — delivered solutions an average of 20% ahead of schedule with zero critical post-go-live issues.

EDUCATION

Bachelor of Engineering — Electrical & Electronics

Jeppiaar Engineering College | Jan 2018 – Dec 2022 | Chennai, India
